## THE LSO FOUNDATION

The LSO Foundation was created to raise awareness of skin cancer through the efforts of education, prevention and early detection. Skin Cancer is the most common form of cancer in the U.S. and is easily preventable with education on how to protect your skin and early screening. In the past three years, The LSO Foundation has implemented the following programs to tackle skin cancer and sun safety education in our community:

- THE SUN SHADE PROJECT, shading community playgrounds with sun shade canopies
- THE HAT PROJECT, providing hats for lifeguards and outdoor workers
- SKIN CANCER EDUCATION, creating a skin cancer video for salon professionals
- THE HAT RUN, a fun and educational 5K with on-site skin cancer screening available.
